

Cut costs, build resilience, and protect your assets with expert energy efficiency and retrofit solutions

Support for Energy and Emission-Saving Retrofits

BCNPHA's coaching services help non-profit housing providers identify high impact retrofit opportunities. By connecting people, data, finances, and assets, we support long-term building sustainability and improved tenant comfort.

How it Works

We support you through every stage of the retrofit journey

- Energy benchmarking
- Energy audits and opportunity assessments
- Rebates and incentives
- Liaise with contractors and engineers
- Project coaching and monitor success

Types of Retrofits: lighting, heating, ventilation, cooling, domestic hot water, and building envelopes.

Funding: we specialize in retrofit funding programs – from simple retrofits to deep energy retrofits. Please see the BCRA information sheet for more information on deep energy retrofits.

When to reach out

Contact us if you are experiencing

- High energy use
- Retrofits identified in the building condition assessment or capital plan
- Equipment nearing end-of-life
- Equipment failure - or ideally, before it happens!

Why Retrofit

For Tenants

- Cost: Reduce utility costs
- Climate: Improve indoor air quality and comfort
- Comfort: Better heating and cooling

For Societies and Co-ops

- Cost: Lower operational and maintenance costs,
- Climate: Cut GHG emissions and meet climate targets
- Comfort: Create climate-resilient buildings

Contact us for Free Coaching

Since 2010, our Building & Asset Management team has supported non-profit housing providers with every type of retrofit, helping maximize rebates, energy savings, and tenant comfort.

We work with funding agencies across BC and Canada to unlock incentives for your projects.
